👤 Profile

Courteous and enthusiastic, I am interested in web development and everything around in its orbit. Fascinated by web programming, started developing applications and building websites. Being a self taught web developer gained experience in learning new technologies at ease. As this area complements my interest in web programming, i am keen to gain more experience in this field.For this reason, i am deliberately seeking to obtain a position and establish a career as a Full Stack Developer with a high-profile organization.

Web development   **09/2018 – present**

- Project-focused intensive program with emphasis on Mongo, Express, React, and   Nodejs (MERN) technical stack.

- Developed a full-stack web application, "DevConnector", using React that allows developers to create profile/portfolio. Used React to develop the front end which includes variety of advanced features. Also, Redux was used to handle the state management.The backend, was built using Node, Express, and Mongo which also takes advantage of well-developed RESTful API,and user authentication with JWT.

- Developed meaningful Front-end applications which include "ReactTube", built using react and redux that allows users to search youtube videos and fetch top 15 related videos,and "Finddit" which allows users to search any topic available on reddit and display relevant content.

- Developed vanilla javascript based applications for which HTML,CSS was used to handle front end. No Third party frameworks were used to build the entire application.
